BOOK REVIEW EDITOR

Douglas Altman
Medical Statistics Laboratory, Imperial Cancer Research Fund, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX, U.K.

AIMS AND SCOPE

The Journal will publish papers on practical applications of statistics and other quantitative methods to medicine and its applied sciences. It will embrace all aspects of the collection, analysis, presentation and interpretation of medical data. Specific areas will include clinical trials, diagnostic studies, quality control, laboratory experiments, epidemiology and health care research. The journal will emphasize the relevance of numerical techniques and will aim to communicate statistical and quantitative ideas in a medical context. Examples of applications of statistics to specific projects, articles explaining new statistical methods and reviews of general topics will be published; papers containing extensive mathematical theory will be excluded. The main criteria for publication will be appropriateness of the statistical method to the particular medical problem and clarity of exposition. The ultimate goal of *Statistics in Medicine* is to enhance communication between statisticians, clinicians and medical researchers with the common purpose of advancing knowledge and understanding of quantitative aspects of medicine. It is intended that both the readers and authors of the Journal include statisticians, clinicians, epidemiologists, health researchers, mathematicians and computer scientists interested in medicine.

STATISTICS IN MEDICINE

Issue No. 1, 15 January 1994

Editorial Announcement 1

Statistics in Medicine: Citations of Papers in the First Ten Years 3
M. J. Campbell and S. A. Julious

A Comparative Study of Several Antibiotic Formulations using a Design Based on a Combination of Balanced Incomplete Blocks and Latin Squares 11
P. Prescott, J. Ryan and P. Shuttleworth

Estimating Age, Period and Cohort Effects using the Multistage Model for Cancer 23
T. R. Holford, Z. Zhang and L. A. McKay

On the Analysis of Life Tables for Dependent Observations 43
B. Eriksson and R. Adell

Network Analytic Methods for Epidemiological Risk Assessment 53
M. Altmann, B. C. Wee, K. Willard, D. Peterson and L. C. Gatewood

Cohort versus Cross-sectional Design in Large Field Trials: Precision, Sample Size, and a Unifying Model 61
H. A. Feldman and S. M. McKinlay

Sample Size Requirements for Stratified Prospective Studies with Null Hypothesis of Non-unity Relative Risk using the Score Test 79
J.-M. Nam

Selecting the Best Dose when a Monotonic Dose–response Relation Exists 87
E. Russek-Cohen and R. M. Simon

BOOK REVIEWS 97
J. Olsen and D. Trichopoulos (Eds.), Teaching Epidemiology: What you Should Know and What you Could Do. *John C. Duffy (Ed.)*, Alcohol and Illness: The Epidemiological Viewpoint

CORRECTIONS 99

Indexed or abstracted by 'BIOMED Database Institute for Scientific Information (ISI)', 'BIOSIS', 'Biostatistica', 'CAB Abstracts', 'Cambridge Scientific Abstracts', 'Chronic Diseases in Canada', 'Compumath Citation Index (ISI)', 'Current Awareness in Biological Sciences', 'Current Contents (CC)/Clinical Medicine', 'CC/Life Sciences', 'Current Index to Statistics', 'Engineering in Medicine and Biology', 'Excerpta Medica', 'Leprosy Research Foundation', 'Operations Research/Management Science', 'Paediatric and Perinatal Epidemiology', 'Quality Control and Applied Statistics', 'Research Alert (ISI)', 'SCISEARCH Database (ISI)', 'Statistical Theory and Method Abstracts'.

Issue No. 2, 30 January 1994

Group Sequential Testing in Clinical Trials with Multivariate Observations: A Review 101
J. W. Lee

Estimating the Variations and Autocorrelations in Dietary Intakes on Weekdays and Weekends 113
A. Bhargava, R. Forthofer, S. McPherson and M. Nichaman

Estimating the Accuracy of Dietary Questionnaire Assessments: Validation in Terms of Structural Equation Models 127
R. Kaaks, E. Riboli, J. Estève, A. L. van Kappel and W. A. van Staveren

A Robust Goodness-of-fit Test Statistic with Application to Ordinal Regression Models 143
S. R. Lipsitz and J. F. Buoncristiani

Non-hierarchical Logistic Models and Case-only Designs for Assessing Susceptibility in Population-based Case-control Studies 153
W. W. Piegorsch, C. R. Weinberg and J. A. Taylor

Median Time from Seroconversion to AIDS in Italian HIV-positive Haemophiliacs: Different Parametric Estimates 163
F. Chiarotti, M. Palombi, N. Schinaia, A. Ghirardini and R. Bellocco

Estimation of the Number of People in a Register from the Number of Birthdates 177
S. O. Larsen

Designing an Optimal Experiment for Bayesian Estimation: Application to the Kinetics of Iodine Thyroid Uptake 185
Y. Merlé, F. Mentré, A. Mallet and A. H. Aurengo

LETTERS TO THE EDITOR 197

BOOK REVIEW 199
Michael C. Neale and Lon R. Cardon, Methodology for Genetic Studies of Twins and Families

Issue No. 3, 15 February 1994

Foundations of Medical Diagnosis: What Actually are the Parameters Involved in Bayes' Theorem? 201
O. S. Miettinen and J. J. Caro

Commentary 211
C. B. Begg

Rejoinder 213
O. S. Miettinen and J. J. Caro

Fisher's Game with the Devil 217
S. Senn

Estimation of Time Since Infection using Longitudinal Disease-marker Data 231
N. Dubin, S. Berman, M. Marmor, B. Tindall, D. Des Jarlais and M. Kim

Comparative Exposure Ratios: A Non-parametric, Multifactor Technique for Case-control Studies 245
M. Aickin, C. Ritenbaugh, E. Surwit and F. Meyskens, Jr.

A Geometric Approach to the Analysis of Physiological Flow Data 261

Practical Problems in Fitting a Proportional Hazards Model to Data with Updated Measurements of the Covariates 301
D. G. Altman and B. L. De Stavola

Application of Sample Survey Methods for Modelling Ratios to Incidence Densities 343
L. M. Lavange, L. L. Keyes, G. G. Koch and P. A. Margolis

Exposure Efficacy and Change in Contact Rates in Evaluating Prophylactic HIV Vaccines in the Field 357
M. E. Halloran, I. M. Longini Jr., M. J. Haber, C. J. Struchiner and R. C. Brunet

Design and Analysis Considerations in a Cohort Study Involving Repeated Measurement of Both Exposure and Outcome: The Association between Genital Papillomavirus Infection and Risk of Cervical Intraepithelial Neoplasia 379
S. W. Duffy, T. E. Rohan and J. R. McLaughlin

Sample Size Determination for an Exponential Survival Model with an Unrestricted Covariate 391
B. Zhen and J. R. Murphy

Issue No. 5/6/7, 15 March–15 April 1994

NATIONAL INSTITUTES OF HEALTH CONFERENCE ON CURRENT TOPICS IN BIOSTATISTICS BETHESDA, MARYLAND, U.S.A., 25–26 JANUARY 1992
Guest Editors: Jonas H. Ellenberg, Mitchell H. Gail and Richard M. Simon

Preface *J. H. Ellenberg, M. H. Gail and R. M. Simon* 399
Introduction *S. W. Greenhouse* 401
NIH and the Birth of Biostatistics *B. Healy* 403

CLINICAL TRIALS
The Utility of Large, Simple Trials in the Evaluation of AIDS Treatment Strategies 405
S. S. Ellenberg and M. A. Foulkes
New Designs for the Selection of Treatments to be Tested in Randomized Clinical Trials 417
R. Simon, P. F. Thall and S. S. Ellenberg
A Multiple Decision Procedure in Clinical Trials *T. T. Chen and R. Simon* 431
Discussion 447

REPEATED MEASURES
Time Series for Modelling Counts from a Relapsing–remitting Disease: Application to Modelling Disease Activity in Multiple Sclerosis 453
P. S. Albert, H. F. McFarland, M. E. Smith and J. A. Frank
Modelling Transitional and Joint Marginal Distributions in Repeated Categorical Data 467
D. Follmann
A Comparison of Likelihood-based and Marginal Estimating Equation Methods for Analysing Repeated Ordered Categorical Responses with Missing Data: Application to an Intervention Trial of Vitamin Prophylaxis for Oesophageal Dysplasia 479
S. D. Mark and M. H. Gail
Discussion 495

GENERAL METHODOLOGY I
Advances in Statistical Methodology for the Evaluation of Diagnostic and Laboratory Tests 499
G. Campbell
Regression Analysis with Clustered Data *B. I. Graubard and E. L. Korn* 509
Spatial Distribution of Neurons in Tissue Culture Wells: Implications for Sampling Methods to Estimate Population Size 523
L. M. McShane and M. Palmatier
Empirical Bayes Estimation and Inference for the Random Effects Model with Binary Response 541
M. A. Waclawiw and K.-Y. Liang
Discussion 553

COHORT STUDIES
Selection Bias in Observational and Experimental Studies *J. H. Ellenberg* 557
A Data-analytic Approach for Estimating Lead Time and Screening Benefit based on Survival Curves in Randomized Cancer Screening Trials 569
K. Kafadar and P. C. Prorok
Mixed-effects Regression Models for Studying the Natural History of Prostate Disease 587
J. D. Pearson, C. H. Morrell, P. K. Landis, H. B. Carter and L. J. Brant
Discussion 603

MISSING DATA
Composite Linear Models for Incomplete Multinomial Data *S. G. Baker* 609
The Partial Questionnaire Design for Case-control Studies 623
S. Wacholder, R. J. Carroll, D. Pee and M. H. Gail
Testing for Differences in Changes in the Presence of Censoring: Parametric and Non-parametric Methods *M. C. Wu, S. Hunsberger and D. Zucker* 635
Discussion 647

EPIDEMIOLOGIC METHODS
A Comparison of Three Approaches to Estimate Exposure-specific Incidence Rates from Population-based Case-control Data *J. Benichou and S. Wacholder* 651
Stochastic Curtailing and Conditional Power in Matched Case-control Studies 663
S. Hunsberger, P. Sorlie and N. L. Geller
Sources of Bias in Studies of Time to Pregnancy *C. R. Weinberg, D. D. Baird and A. J. Wilcox* 671
Discussion 683

PRECLINICAL STUDIES
A Comparison of Tumour Incidence Analyses Applicable in Single-sacrifice Animal Experiments *G. E. Dinse* 689
Meta-analysis of Animal Experiments on Dietary Fat Intake and Mammary Tumours 709
L. S. Freedman
Discrimination Techniques Applied to the NCI *in vitro* Anti-tumour Drug Screen: Predicting Biochemical Mechanism of Action *A. D. Koutsoukos, L. V. Rubinstein, D. Faraggi, R. M. Simon, S. Kalyandrug, J. N. Weinstein, K. W. Kohn and K. D. Paull* 719
Discussion 731

GENERAL METHODOLOGY II
Measures of Agreement: a Single Procedure *J. J. Bartko* 737
On Non-parametric and Generalized Tests for the Two-sample Problem with Location and Scale Change Alternatives *M. J. Podgor and J. L. Gastwirth* 747
Studying the Relationship between Change and Initial Value in Longitudinal Studies 759
G. O. Zerbe, M. C. Wu and D. M. Zucker
Some Power Considerations when Deciding to Use Transformations *A. Kingman and G. Zion* 769

Issue No. 8, 30 April 1994

The First *t*-test 785
S. Senn and W. Richardson

Multi-state Markov Models for Analysing Incomplete Disease History Data with Illustrations for HIV Disease 805

STATISTICS IN MEDICINE

Issue No. 9, 15 May 1994

Empirical Bayes Methods for Estimating Hospital-specific Mortality Rates 889
N. Thomas, N. T. Longford and J. E. Rolph

Extending a Bayesian Analysis of the Two-period Crossover to Allow for Baseline Measurements 905
A. P. Grieve

Fitting Multivariate Polynomial Growth Curves in Two-period Crossover Designs 931
J. M. Grender and W. D. Johnson

Use of Surrogate Information Time for Monitoring the Effect of Treatment on the Change in a Response Variable in Clinical Trials 945
M. C. Wu, K. K. G. Lan and J. E. Connett

Surrogate and Auxiliary Endpoints in Clinical Trials, with Potential Applications in Cancer and AIDS Research 955
T. R. Fleming, R. L. Prentice, M. S. Pepe and D. Glidden

Smoothing Grouped Bivariate Data to Obtain the Incubation Period Distribution of AIDS 969
J. M. G. Taylor and Y. Chon

AIMS AND SCOPE

The Journal will publish papers on practical applications of statistics and other quantitative methods to medicine and its applied sciences. It will embrace all aspects of the collection, analysis, presentation and interpretation of medical data. Specific areas will include clinical trials, diagnostic studies, quality control, laboratory experiments, epidemiology and health care research. The journal will emphasize the relevance of numerical techniques and will aim to communicate statistical and quantitative ideas in a medical context. Examples of applications of statistics to specific projects, articles explaining new statistical methods and reviews of general topics will be published; papers containing extensive mathematical theory will be excluded. The main criteria for publication will be appropriateness of the statistical method to the particular medical problem and clarity of exposition. The ultimate goal of *Statistics in Medicine* is to enhance communication between statisticians, clinicians and medical researchers with the common purpose of advancing knowledge and understanding of quantitative aspects of medicine. It is intended that both the readers and authors of the Journal include statisticians, clinicians, epidemiologists, health researchers, mathematicians and computer scientists interested in medicine.

CONTENTS

Volume 13, Issue Nos. 17–24

STATISTICS IN MEDICINE

Issue No. 17, 15 September 1994

Helping Doctors to Draw Appropriate Inferences From the Analysis of Medical Studies 1699
P. R. Burton

Testing for Baseline Balance in Clinical Trials 1715
S. Senn

An Optimal Three-Stage Design for Phase II Clinical Trials 1727
L. G. Ensign, E. A. Gehan, D. S. Kamen and P. F. Thall

Effect of Verification Bias on Positive and Negative Predictive Values 1737
X.-H. Zhou

Analysing Survival in the Presence of an Auxiliary Variable 1747
D. M. Finkelstein and D. A. Schoenfeld

Projection of Incidence Rates to a Larger Population Using Ecologic Variables 1755
C. M. Frey, E. J. Feuer and M. J. Timmel

Interval Censoring in Longitudinal Data of Respiratory Symptoms in Aluminium Potroom Workers: A Comparison of Methods 1771
S. O. Samuelsen and J. Kongerud

Standardized Rates of Recurrent Outcomes 1781
T. A. Stukel, R. J. Glynn, E. S. Fisher, S. M. Sharp, G. Lu-Yao and J. E. Wennberg

LETTERS TO THE EDITOR 1793

BOOK REVIEW 1797
Per Kragh Andersen, Ørnulf Borgan, Richard D. Gill and Niels Keiding, Statistical Models Based on Counting Processes

Indexed or abstracted by 'BIOMED Database Institute for Scientific Information (ISI)', 'BIOSIS', 'Biostatistica', 'CAB Abstracts', 'Cambridge Scientific Abstracts', 'Chronic Diseases in Canada', 'Compumath Citation Index (ISI)', 'Current Awareness in Biological Sciences', 'Current Contents (CC)/Clinical Medicine', 'CC/Life Sciences', 'Current Index to Statistics', 'Engineering in Medicine and Biology', 'Excerpta Medica', 'Leprosy Research Foundation', 'Operations Research/Management Science', 'Paediatric and Perinatal Epidemiology', 'Quality Control and Applied Statistics', 'Research Alert (ISI)', 'SCISEARCH Database (ISI)', 'Statistical Theory and Method Abstracts'.

Issue No. 18, 30 September 1994

A Comparison of Two Phase I Trial Designs 1799
E. L. Korn, D. Midthune, T. T. Chen, L. V. Rubinstein, M. C. Christian and R. M. Simon

Reduction in Burden of Illness: A New Efficacy Measure for Prevention Trials 1807
M. N. Chang, H. A. Guess and J. F. Heyse

A Unified Method for Monitoring and Analysing Controlled Trials 1815
J. Grossman, M. K. Parmar, D. J. Spiegelhalter and L. S. Freeman

Deviance Estimates of Sample Size for Equivalence Tests in Vaccine Trials 1827
J. B. Garner

Byesian Hierarchical Analysis of Within–Units Variances in Repeated Measures Experiments 1841
T. R. Ten Have and V. M. Chinchilli

Stratification of Summary Statistics Tests According to Missing Data Patterns 1853
J. D. Dawson

Simultaneous Back-Projection of Aids Incidence Data for Two or More Groups 1865
I. C. Marschner, S. V. Newstead and N. G. Becker

Estimates of Disease Incidence in Women Based on Antenatal or Neonatal Seroprevalence Data: HIV in New York City 1881
A. E. Ades and G. F. Medley

LETTER TO THE EDITOR 1895

CORRECTION 1897

Issue No. 19/20, 15 October 1994–30 October 1994

PROCEEDINGS OF THE CONFERENCE
QUANTITATIVE METHODS FOR STUDYING AIDS
BLAUBEUREN, GERMANY, 14–18 JUNE 1993
Guest Editors: K. Dietz, Peter Bacchetti and Marcello Pagano

Foreword 1899
K. Dietz and D. L. Thomsen

Preface 1901
K. Dietz, P. Bacchetti and M. Pagano

STUDIES OF AIDS AND HIV SURVEILLANCE

Screening Tests: Can We Get More by Doing Less? 1905
X. M. Tu, E. Litvak and M. Pagano

Seasonal and Other Short-term Influences on United States AIDS Incidence 1921
P. Bacchetti

ESTIMATING HIV INCIDENCE AND AIDS PROJECTIONS

Prediction & Validation in the Public Health Modelling of HIV/AIDS 1933
N. T. J. Bailey

Dependent HIV Incidences in Back–projection of AIDS Incidence Data 1945
N. G. Becker and X. Chao

Using Time of First Positive HIV Test and Other Auxiliary Data in Back–projection of AIDS Incidence 1959
I. C. Marschner

Backcalculation Models of Age-specific HIV Incidence Rates 1975
P. S. Rosenberg

Back–projection of German AIDS Data Using Information on Dates of Tests 1991
K. Dietz, J. Seydel and B. Schwartländer

Incorporating HIV Test Data into Forecasts of the AIDS Epidemic in Scotland 2009
G. M. Raab, K. L. Fielding and G. Allardice

MARKERS AND INCUBATION TIMES

The Effect of Covariates on the Induction Time of AIDS Using Improved Imputation of Exact Seroconversion Times 2021
K. Gauvreau, V. DeGruttola and M. Pagano

Distribution of the Latency Period for Perinatally Acquired AIDS 2031
S. MaWhinney and M. Pagano

Non–parametric Analysis of Transfusion-related HIV and AIDS Incidence Data 2043
M. Motika, N. G. Becker, B. Wylie, J. Learmont and J. Kaldor

Marker Values at the Time of an AIDS Diagnosis 2059
J. M. G. Taylor and D. K. Kim

A Model for AIDS Pathogenesis 2067
D. Schenzle

INEFFECTIVITY

Non–parametric Estimation and Doubly-censored Data: General Ideas and Applications to AIDS 2081
N. P. Jewell

Modeling the Female-to-Male Per-Act HIV Transmission Probability in an Emerging Epidemic in Asia 2097
G. A. Satten, T. D. Mastro and I. M. Longini Jr

METHODS OF STUDYING INTERVENTIONS

Considerations in Choice of Clinical Endpoint for AIDS Clinical Trials 2107
J. D. Neaton, D. N. Wentworth, F. Rhame, C. Hogan, D. I. Abrams and L. Deyton for the Terry Beirn Community Programs for Clinical Research on AIDS (CPCRA)

The Effectiveness of Interventions on Incubation of AIDS as Measured by Secular Increases within a Population 2127
D. R. Hoover, J. M. G. Taylor, L. Kingsley, J. S. Chmiel, A. Muñoz, Y. He and A. Saah

Assessing Drug Compliance Using Longitudinal Marker Data, with Application to AIDS 2141
H. M. Kim and S. W. Lagakos

Some Statistical Issues in HIV Vaccine Trials 2155
W. N. Rida and D. N. Lawrence

A Method for Evaluating Needle Exchange Programs 2179
E. H. Kaplan

Issue No. 21, 15 November 1994

Mid-*P* Confidence Intervals for the Poisson Expectation 2189
G. R. Cohen and S-Y. Yang

On Prediction of Future Observation in Growth Curve Model 2205
J. J. Tian, R. Shukla and R. Buncher

Testing for Omitted Variables and Non-linearity in Regression Models for Longitudinal Data 2219
M. Palta, T-J. Yao and R. Velu

Cox Regression Analysis of Multivariate Failure Time Data: The Marginal Approach 2233
D. Y. Lin

On the Development of the Medical Research Council Trial of α-Interferon in Metastatic Renal Carcinoma 2249
P. M. Fayers, P. A. Cook, D. Machin, N. Donaldson, J. Whitehead, A. Ritchie, R. T. D. Oliver, members of the Urological Working Party Renal Carcinoma Subgroup and P. Yuen

A Step-down Procedure for Multiple Tests of Treatment versus Control in Each of Several Groups 2261
S. H. Cheung and B. Holland

The Paired Availability Design: A Proposal for Evaluating Epidural Analgesia During Labor 2269
S. G. Baker and K. S. Lindeman

LETTERS TO THE EDITOR 2279

BOOK REVIEWS 2287
Stanton A. Glantz, Primer of Biostatistics, Third edn. *J. L. A. van Rijckevorsel and C. C. J. H. Bijleveld (Eds.)*, A Reader on Applying Statistics in Public Health and Prevention.

Issue No. 22, 30 November 1994

A Direct, General Approach Based on Isobolograms for Assessing the Joint Action of Drugs in Pre-clinical Experiments 2289
S. G. Machado and G. A. Robinson

Monitoring of a Pilot Toxicity Study with Two Adverse Outcomes 2311
R. Etzioni and M. S. Pepe

On a Model-based Approach to Estimating Efficacy in Clinical Trials 2323
J. M. Albert and D. L. DeMets

The Use of a Square Array Scheme in Blood Testing 2337
R. M. Phatarfod and A. Sudbury

Attributable Fraction Estimates and Case Definitions for Malaria in Endemic Areas 2345
T. Smith, J. A. Schellenberg and R. Hayes

Age-related Reference Ranges: Significance Tests for Models and Confidence Intervals for Centiles 2359
A. M. Wade and A. E. Ades

Determining the Size of a Cross-sectional Sample to Estimate the Age-specific Incidence of an Irreversible Disease 2369
I. C. Marschner

LETTER TO THE EDITOR 2383

BOOK REVIEWS 2385
Brian Everitt and Dale Hay, Talking About Statistics: A Psychologist's Guide to Design and Analysis. *Murin J. Khoury, Terri H. Beaty and Bernice H. Cohen*, Fundamentals of Genetic Epidemiology. *Nicholas P. Jewell, Klaus Dietz and Vernon T. Farewell (Eds.)*, AIDS Epidemiology: Methodological Issues. *Alfredo Nicolosi (ed.)*, AIDS Epidemiology: Models and Methods.

Issue No. 23/24, 15 December 1994–30 December 1994

Papers from the International Meetings of the International Society for Clinical Biostatistics

Preface 2389

ISCB Committee 2391

Publications from Multicentre Clinical Trials: Statistical Techniques and Accessibility to the Reader 2393
M. J. Marsh and B. S. Hawkins

Correspondence Analysis Applied to Grouped Cohort Data 2407
M. Grassi and S. Visentin

Penalized Likelihood in Cox Regression 2427
P. J. M. Verweij and H. C. van Houwelingen

Separation of Systematic and Random Differences in Ordinal Rating Scales 2437
E. Svensson and S. Holm

Internal Pilot Studies for Estimating Sample Size 2455
M. A. Birkett and S. J. Day

A Critical Discussion of Intraclass Correlation Coefficients 2465
R. Müller and P. Büttner

Growth Charts for Both Cross-Sectional and Longitudinal Data 2477
T. J. Cole

Sample Sizes for Phase II Clinical Trials Derived from Bayesian Decision Theory 2493
H. C. Brunier and J. Whitehead

A Meta-analysis of Clinical Trials Involving Different Classifications of Response into Ordered Categories 2503
A. Whitehead and N. M. B. Jones

Multistate Modelling of Liver Transplantation Data 2517
B. E. Hansen, J. Thorogood, J. Hermans, R. J. Ploeg, J. H. van Bockel and J. C. van Houwelingen

Fieller's Confidence Intervals for the Ratio of Two Means in the Assessment of Average Bioequivalence from Crossover Data 2531
J. Vuorinen and J. Tuominen

Acknowledgement 2547

Author Index 2549

Subject Index 2553
